

# Getting started with the new Bilstatistik.dk

USER GUIDE

# Search criteria

The display of search criteria is dynamic, and you can decide which search criteria you see and in what order they are displayed.

It is of course possible to change this on an ongoing basis if your needs change.

To begin with, your search page is completely blank.

1. Open the “[Search Criteria](#)” panel to specify which search criteria you want to display.

The screenshot shows the bilstatistik.dk website interface. At the top, there is a dark blue header with the logo, 'ADMINISTRATION' link, a search bar, 'HELP' link, and user information 'Klaus Bernhof Jakobsen DBI IT A/S'. Below the header, a light gray sidebar on the left contains a 'SEARCH PROFILES' dropdown and a 'Search criteria' panel (highlighted with a red box and the number 1). The 'Search criteria' panel is titled 'BASIC CRITERIA' and contains the following options:

- Registration type: Three buttons labeled 'Registrations', 'Parc' (which is selected with a checkmark), and 'Insurance change'.
- Date: A dropdown menu showing 'Current parc: 29/09/2025'.
- Age: A dropdown menu showing 'All'.
- Age in fleet: A dropdown menu showing 'All'.

At the top right of the main content area, it says 'Data is updated on Monday, 29 September 2025' and a 'RESET' button. At the bottom, a dark blue footer displays 'VEHICLES 5,064,313', 'COMPANIES 0', a 'By make' dropdown, a 'Show in Excel' button, and a green 'SHOW REPORT >' button.

# Customizing the search criteria

2. Turn the available search criteria on and off.
3. The panel closes automatically when you click somewhere else on the screen.
4. You can easily close or minimize a panel.
5. You can drag a panel to another position to change the order of the open panels.

The screenshot displays the bilstatistik.dk website interface. At the top, there is a navigation bar with the logo, 'ADMINISTRATION' link, a search bar, and user information. The main content area is divided into several panels. On the left, a 'Search criteria' panel is open, showing a list of search criteria with toggle switches. A red box labeled '2.' highlights this panel. In the center, there is a 'REGISTRATIONS' panel with a 'Parc' dropdown menu. A red box labeled '3.' highlights the 'Parc' dropdown. On the right, there is a 'VEHICLE TYPES' panel with various vehicle type icons and a 'GEOGRAPHY' panel with location selection options. A red box labeled '4.' highlights the 'VEHICLE TYPES' panel, and another red box labeled '5.' highlights the 'GEOGRAPHY' panel. The bottom of the page shows a summary of vehicles (5,064,313) and companies (0), along with buttons for 'Show in Excel' and 'SHOW REPORT'.

# The interface

6. Registrations, Inventory and Insurance Changes have been moved from separate tabs to one combined selection under “Basic Criteria”
7. Vehicle type selection is made via the available vehicle icons. You can still switch to “Extended selection of vehicle types”. Note that the “Segments” selection is embedded in the vehicle types panel.
8. Search profiles have been moved to the top of the criteria page.
9. The button to reset the criteria page is now in the upper right corner of the criteria page.
10. Vehicle counter, company counter, report layout selection and button to export and view report have now been moved down to the bottom of the page, to create a more harmonious process.
11. Searching for individual vehicles and companies has been moved from separate tabs to one combined search field that can always be accessed from the top of the page.

11.

The screenshot displays the bilstatistik.dk web application interface. At the top, a dark blue header contains the logo, navigation links for 'ADMINISTRATION' and 'HELP', a search bar for vehicles or companies, and a user profile for Klaus Bernhof Jakobsen. Below the header, the main content area is divided into several panels. A 'SEARCH PROFILES' dropdown is located at the top left. The 'BASIC CRITERIA' panel (labeled 6) includes options for 'Registrations', 'Parc', and 'Insurance change', along with date and period selection fields. The 'VEHICLE TYPES' panel (labeled 7) features a grid of vehicle icons and a 'RESET' button (labeled 9). The 'MAKES AND MODELS' panel shows a list of vehicle models. The 'GEOGRAPHY' panel includes radio buttons for location selection and a 'SELECT' button. At the bottom, a 'USER' panel and a statistics bar are visible. The statistics bar shows 'VEHICLES 1,466' and 'COMPANIES 0', along with a 'By make' dropdown, a 'Show in Excel' button, and a 'SHOW REPORT' button (labeled 10). A date update notice 'Data is updated on Monday, 29 September 2025' is also present.

# Report views

12. Once you have run a report, it is possible to add a new “view”.

This will correspond to previously changing the report layout of the run report, but now an extra tab will be added instead, with the new report.

Note that a new view is always based on the data the current view consists of.

This will allow you to create numerous parallel reports.

Only when you click “**Back**”, the reports will be closed.

13. Searched vehicle and company reports are arranged as tabs along the views. This allows you to have **several reports** open at the same time.

14. If supported by the format of the report being run, it will be possible to present the report in diagram form.

Via the “Diagram” button, settings will also appear for how the diagram should look.

15. It is possible to save the diagram as an image (in PNG format).
